

Sickness and Illness Policy

At Ribbons Preschool we promote the good health of all children attending, including oral health by:

- Asking parents to keep children at home if they are unwell. If a child is unwell it is in their best interest to be in a home environment rather than at preschool with their peers.
- Asking staff and other visitors not to attend the setting if they are unwell
- Helping children to keep healthy by providing balanced and nutritious snacks, meals and drinks
- Minimising infection through our rigorous cleaning and hand washing processes (see Infection control policy)
- Ensuring children have regular access to the outdoors and having good ventilation inside
- Sharing information with parents about the importance of the vaccination programme for young children to help protect them and the wider society from communicable diseases
- Sharing information from the Department of Health that all children aged 6 months – 5 years should take daily vitamins
- Having areas for rest and sleep, where required and sharing information about the importance of sleep and how many hours young children should be having.

Our procedures

In order to take appropriate action regarding children who become ill, and to minimise the spread of infection, we implement the following procedures:

- If a child becomes ill during the preschool day, we contact their parent(s) and ask them to pick up their child as soon as possible. During this time we care for the child in a quiet, calm area with their key worker (wearing PPE), wherever possible
- We follow the guidance given to us by Infection Prevention and Control for Childcare Settings (0-5 years) Nurseries, Child Minders and Playgroups and advice from our local health protection unit on exclusion times for specific illnesses, e.g. sickness and diarrhoea, measles and chicken pox, to protect other children in the preschool
- Should a child have an infectious disease, such as sickness and diarrhoea, they must not return to preschool until they have been clear for at least 48 hours. We notify the CIW as soon as possible where we have any child or staff member with food poisoning.
- We inform all parents if there is a contagious infection identified in the preschool, to enable them to spot the early signs of this illness. We thoroughly clean and sterilise all equipment and resources that may have come into contact with a contagious child to reduce the spread of infection
- We ask parents to keep children on antibiotics at home for the first 48 hours of the course (unless this is part of an ongoing care plan to treat individual medical conditions e.g. asthma and the child is not unwell). This is because it is important that children are not subjected to the rigours of the preschool day, which requires socialising with other children and being part of a group setting, when they have first become ill and require a course of antibiotics
- We have the right to refuse admission to a child who is unwell. This decision will be taken by the manager on duty and is non-negotiable
- We make information and posters about head lice readily available and all parents are requested to regularly check their children's hair. If a parent finds that their child has head lice, we would be grateful if they could inform the preschool so that other parents can be alerted to check their child's hair.

Meningitis procedure

If a parent informs the preschool that their child has meningitis, the preschool manager should contact the Health Protection Team (HPT) and CIW. The HPT will give guidance and support in each individual case. If parents do not inform the preschool, we may be contacted directly by the HPT and the appropriate support will be given. We will follow all guidance given and notify the appropriate authorities including CIW where necessary.

We will follow the transporting children to hospital procedure in any cases where children may need hospital treatment.

The preschool manager/staff member must:

- Inform a member of the management team immediately
- Call 999 for an ambulance immediately if the illness is severe. DO NOT attempt to transport the unwell child in your own vehicle
- Follow the instructions from the 999 call handler
- Whilst waiting for the ambulance, a member of staff must contact the parent(s) and arrange to meet them at the hospital
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.

***If a child has an accident that may require hospital treatment but not an ambulance and you choose to transport children within staff vehicles, Citation advice is to consider the following in your policy:*

- *Requesting permission from parents*
- *Ratio requirements of the setting being maintained*
- *The age and height of the child, in regards to if they will need a car seat. Further guidance can be found at www.childcarseats.org.uk/types-of-seat/*
- *There are some exceptions for needing a child seat depending again on their age. Further guidance can be found at www.childcarseats.org.uk/the-law/cars-taxis-private-hire-vehicles-vans-and-goods-vehicles/#under-three*
- *With the fitting of the car seat, we also need to ask has the individual had training in carrying in carrying this out*
- *Is this transport covered under business insurance, so a call to your insurance company will be needed, or do they have business insurance on their vehicle?*
- *Safeguarding of the child needs to be looked at. In certain situations, e.g. a designated member of staff should be appointed to plan and provide oversight of all transporting arrangements and respond to any difficulties that may arise. Wherever possible and practicable it is advisable that transport is undertaken other than in private vehicles, with at least one adult additional to the driver acting as an escort. Staff should ensure that the transport arrangements and the vehicle meet all legal requirements. They should ensure that the vehicle is roadworthy and appropriately insured and that the maximum capacity is not exceeded*

- *Emergency procedures, e.g. what happens if the child's health begins to deteriorate during the journey.*

This policy will be reviewed at least annually in consultation with staff and parents and/or after a significant incident, e.g. serious illness/hospital visit required.

* For the purpose of this publication the term 'parents' will be used to describe all types of primary caregivers, such as biological and adoptive parents, foster carers and guardians
